

TEKRAM INSTRUMENTAL TRAINING COURSE

Tekran's intensive training courses for our **Laboratory and Ambient** product lines are designed to provide our customers with in-depth information regarding the operating principals and features of our instrumentation. These courses compliment the instrument manual and allow users to progress more efficiently into a confident and competent operator. Courses are catered to the individual background and interest of the trainee. The agenda listed below is considered a typical framework and is subject to adjustment. All persons completing the training course will receive a Tekran certified operator certificate.

Introduction – Morning, Day 1

- Instrument principles of operation
- Detailed operation of components and parts

Data Production – Afternoon, Day 1

- Hands-on introduction to instrument operation
- Potential problems with ultra-trace mercury monitoring
- Recognition of bad data

Maintenance Operations – Morning, Day 2

- Pre-analysis procedures
- Routine Maintenance

Day 2: PM – Repair Operations

- Advanced repair techniques
- Instrument troubleshooting

TRAINING COURSE OPTIONS

Option #1: Training in Toronto/Seattle

Tekran offers free training at our Toronto location with all instrument purchases. The client pays for airfare and hotel, and Tekran arranges ground transportation to our Toronto office. Lunch and dinner will be provided at no extra cost.

Option #2: Training at Client Location

Tekran will travel to client location to conduct the above training course. Client pays for Tekran employee travel costs and nominal hourly fee based on an 8-hour workday.

Option #3: Training at Client Location with Site Audit/Inspection

Tekran will travel to client location to conduct the above training course. Client pays for Tekran employee travel costs and nominal hourly fee based on an 8-hour workday. Upon completion of training activities, Tekran will perform inspection of instrument installation and facilities. Tekran will perform instrument optimization and highlight improvement opportunities.
